

MyoData Platform

Contact Sheet - New Project Request / Support

The MyoData platform brings together a multidisciplinary team with a shared foundation of expertise in Data. It provides structural support and expertise to researchers and clinicians at the institute in managing, integrating, and analyzing data, from study design through to data interpretation.

The platform's scope is defined by four key areas: technical data management, data-driven project management, bioinformatics, and biostatistics.

TEAM COMPOSITION

- Maxime Jacoupy, PhD, Platform Manager
- Nathalie Peillod, MS, Data Project Manager, Clinical Data Manager
- Maria Kondili, MSc, Bioinformatician
- Natalia Pinzon, PhD, Bioinformatician
- Frédéric Fer, MS, Biostatistician
- Manon Brechenmacher, Biostatistics Intern

AREAS OF EXPERTISE

Data Management	Bioinformatics	Biostatistics	Data Project Management
Data organization and management	Omics data analysis	Study design and planning	Project planning and organization
Data security, quality, and compliance	Development of bioinformatics tools and resources	Data analysis and interpretation	Coordination and communication
Technical support and infrastructure management	Research collaboration and support	Communication and collaboration	eCRF (electronic Case Report Form) design
